Kirk Milling, CEO, commented "I'm pleased to report the corrective actions we undertook earlier in the year to resolve production issues encountered from lower ore quality paid off in the form of higher production and sales volumes in the quarter. In fact, we set several new production records during the quarter as we came out of our maintenance outage in April and believe we are poised for even higher production levels in the second half of the year.

"International pricing was relatively flat compared to first quarter as higher Asian prices were offset by mix issues experienced in Latin America. We believe most of the Chinese production that was taken off-line earlier in the year is now running again and therefore we anticipate this will lead to slightly softer prices in Asia during the 3rd quarter. However, we should be able to offset any pricing impact with continued diligent cost management and higher production volumes. As a result, we remain comfortable with our 2016 outlook."

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

The following table sets forth a summary of net sales, sales volumes and average sales price, and the percentage change between the periods.

	Three Months Ended June 30, 2016	Three Months Ended June 30, 2015	Percent Increase/(Decrease)
Net sales ($ in millions):			
Domestic	$ 48.0	$ 49.8	(3.6)%
International	$ 68.7	$ 72.4	(5.1)%
Total net sales	$ 116.7	$ 122.2	(4.5)%
Sales volumes (thousands of short tons):			
Domestic	221.1	219.5	0.7%
International	455.5	440.9	3.3%
Total soda ash volume sold	676.6	660.4	2.5%
Average sales price (per short ton):			
Domestic	$ 217.00	$ 226.77	(4.3)%
International	$ 150.87	$ 164.25	(8.1)%
Average	$ 172.48	$ 185.03	(6.8)%
Percent of net sales:			
Domestic sales	41.1%	40.8%	0.7%
International sales	58.9%	59.2%	(0.5)%
Total percent of net sales	100.0%	100.0%	

Consolidated Results

Net sales . Net sales decreased by 4.5% to $116.7 million for the three months ended June 30, 2016 from $122.2 million for the three months ended June 30, 2015 , driven by a decrease in total average sales price of 6.8% , slightly offset by an increase in soda ash volumes sold of 2.5% .

Domestic average sales price declined 4.3% in the three months ended June 30, 2016 , mostly due to freight. Our efforts to increase our domestic market share resulted in soda ash prices flat to slightly below 2015 levels. However, we had more volume in 2016 to customers who arrange their own freight, as well as one customer who switched volume to a closer location, resulting in lower freight costs. Lower freight costs resulted in a $9.77 reduction in domestic average price per short ton in the second quarter of 2016 .

International average sales price declined 8.1% in the three months ended June 30, 2016 , slightly lower than our full year outlook. Our international sales include both ANSAC and customers in Europe and South Africa. We made a decision to scale back our sales volume into Europe in 2016 due to unfavorable exchange rates, as our net profit from both ANSAC and domestic volumes are higher. The mix shift from Europe to additional ANSAC volume results in lower international prices as the Europe price includes freight all the way to the customer's location.

Cost of products sold. Cost of products sold, including depreciation, depletion and amortization expense, decreased by 3.6% to $88.1 million for the three months ended June 30, 2016 from $91.4 million for the three months ended June 30, 2015 , due primarily to a decrease in maintenance and operating costs, freight costs and compensation and benefit costs, partially offset by an increase in royalty rates and energy costs as a result of higher soda ash volume sold.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

The following table sets forth a summary of net sales, sales volumes and average sales price, and the percentage change between the periods.

International sales	58.5%	59.4%	(1.5)%
Total percent of net sales	100.0%	100.0%	

Consolidated Results

Net sales . Net sales decreased by 4.7% to $231.1 million for the six months ended June 30, 2016 from $242.6 million for the six months ended June 30, 2015 , driven by a decrease in total average sales price of 6.4% , slightly offset by an increase in soda ash volumes sold of 1.8% .

Domestic average sales price declined 5.5% in the six months ended June 30, 2016 , mostly due to freight. Our efforts to increase our domestic market share resulted in soda ash prices flat to slightly below 2015 levels. However, we had more volume in 2016 to customers who arrange their own freight, as well as one customer who switched volume to a closer location, resulting in lower freight costs. Lower freight costs resulted in a $12.59 reduction in domestic average price per short ton for the six months ended June 30, 2016 .

International average sales price declined 7.3% in the six months ended June 30, 2016 , slightly lower than our annual outlook. Our international sales include both ANSAC and customers in Europe and South Africa. We made a decision to scale back our sales volume into Europe in 2016 due to unfavorable exchange rates, as our net profit from both ANSAC and domestic volumes are higher. The mix shift from Europe to additional ANSAC volume results in lower international prices as the Europe price includes freight all the way to the customer's location.

Cost of products sold. Cost of products sold, including depreciation, depletion and amortization expense, decreased by 2.7% to $174.5 million for the six months ended June 30, 2016 from $179.4 million for the six months ended June 30, 2015 , due primarily to a decrease in maintenance and operating costs, freight costs and compensation and benefit costs, partially offset by an increase in royalty rates.

CAPEX AND ORE TO ASH RATIO

The following table below summarizes our capital expenditures, on an accrual basis, and ore to ash ratio:

($ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Capital Expenditures				
Maintenance	$ 1.8	$ 5.8	$ 2.8	$ 9.4
Expansion	3.2	4.9	7.6	6.3
Total	$ 5.0	$ 10.7	$ 10.4	$ 15.7
Operating and Other Data:				
Ore to ash ratio (1)	1.46: 1.0	1.50: 1.0	1.48: 1.0	1.50: 1.0

(1) Ore to ash ratio expresses the number of short tons of trona ore needed to produce one short ton of soda ash and includes our deca rehydration recovery process.

Capital expenditures during the three and six months ended June 30, 2016 and the three and six months ended June 30, 2015 reflect differences in the timing of capital expenditure programs in each year, respectively.

FINANCIAL POSITION AND LIQUIDITY

As of June 30, 2016 , we had cash and cash equivalents of $16.8 million . In addition, we have approximately $104 million ($200 million, less $76 million outstanding and less standby letters of credit of $20 million) of remaining capacity under our revolving credit facilities. As of June 30, 2016 , our leverage and fixed charge coverage ratios, as calculated per the Ciner Wyoming Credit Facility, were 0.89 and 1.20 , respectively.

CASH FLOWS AND QUARTERLY CASH DISTRIBUTION

Cash Flows

Cash provided by operating activities increased to $66.1 million during the six months ended June 30, 2016 compared to $61.5 million of cash generated during six months ended June 30, 2015 , primarily driven by an increase in cash flows provided from working capital of $9.8 million , partially offset by a decrease of $8.1 million in net income during the six months ended June 30, 2016 compared to six months ended June 30, 2015 .

Cash provided by operating activities during the six months ended June 30, 2016 were partially offset by cash used in investing activities of $11.2 million for capital expenditures and cash used in financing activities during the six month period of $58.5 million , of which majority was due to distributions paid of $44.5 million and repayments on the Ciner Wyoming revolving credit facility of $14.0 million .

Quarterly Distribution

On July 14, 2016 , the Partnership declared its second quarter 2016 quarterly distribution of $0.567 per unit. This represents an increase of 0.5% and 4.1% over the distributions declared during the first quarter 2016 and second quarter of 2015 , respectively. The quarterly cash distribution is payable on August 12, 2016 to unitholders of record on July 29, 2016 .

Non-GAAP Financial Measures

We report our financial results in accordance with generally accepted accounting principles in the United States (“GAAP”). We also present the non-GAAP financial measures of:

- Adjusted EBITDA;
- Distributable cash flow; and
- Distribution coverage ratio.

We define Adjusted EBITDA as net income (loss) plus net interest expense, income tax, depreciation, depletion and amortization and certain other expenses that are non-cash charges or that we consider not to be indicative of ongoing operations. Distributable cash flow is defined as Adjusted EBITDA less net cash paid for interest, maintenance capital expenditures and income taxes, each as attributable to Ciner Resources LP. Distributable cash flow will not reflect changes in working capital balances. We define distribution coverage ratio as the ratio of distributable cash flow as of the end of the period to cash distributions payable with respect to such period.

Adjusted EBITDA, distributable cash flow and distribution coverage ratio are non-GAAP supplemental financial measures that management and external users of our consolidated financial statements, such as industry analysts, investors, lenders and rating agencies, may use to assess:

- our operating performance as compared to other publicly traded partnerships in our industry, without regard to historical cost basis or, in the case of Adjusted EBITDA, financing methods;
- the ability of our assets to generate sufficient cash flow to make distributions to our unitholders;
- our ability to incur and service debt and fund capital expenditures; and
- the viability of capital expenditure projects and the returns on investment of various investment opportunities.

We believe that the presentation of Adjusted EBITDA, distributable cash flow and distribution coverage ratio provide useful information to investors in assessing our financial condition and results of operations. The GAAP measures most directly comparable to Adjusted EBITDA and distributable cash flow are net income and net cash provided by operating activities. Our non-GAAP financial measures of Adjusted EBITDA, distributable cash flow and distribution coverage ratio should not be considered as alternatives to GAAP net income, operating income, net cash provided by operating activities, or any other measure of financial performance or liquidity presented in accordance with GAAP. Adjusted EBITDA and distributable cash flow have important limitations as analytical tools because they exclude some, but not all items that affect net income and net cash provided by operating activities. Investors should not consider Adjusted EBITDA, distributable cash flow and distribution coverage ratio in isolation or as a substitute for analysis of our results as reported under GAAP. Because Adjusted EBITDA, distributable cash flow and distribution coverage ratio may be defined differently by other companies, including those in our industry, our definition of Adjusted EBITDA, distributable cash flow and distribution coverage ratio may not be comparable to similarly titled measures of other companies, thereby diminishing its utility.

The table below presents a reconciliation of the non-GAAP financial measures of Adjusted EBITDA and distributable cash flow to the GAAP financial measures of net income and net cash provided by operating activities:

(1) The Partnership may fund expansion-related capital expenditures with borrowings under existing credit facilities such that expansion-related capital expenditures will have no impact on cash on hand or the calculation of cash available for distribution. In certain instances, the timing of the Partnership's borrowings and/or its cash management practices will result in a mismatch between the period of the borrowing and the period of the capital expenditure. In those instances, the Partnership adjusts designated reserves (as provided in the partnership agreement) to take account of the timing difference. Accordingly, expansion-related capital expenditures have been excluded from the presentation of cash available for distribution.
